Burners

IGNIS, heat from the Heart of Europe!

FLY KUBICEK BURNER

IGNIS is the new burner designed for you by Kubicek. Direct airflow through the base of the burner gives a sharp straight flame with power to match all our competitors' burners. IGNIS is designed with you in mind so it is easy to use and maintain, has reduced condensation and puts plenty of power at your fingertips. The standard IGNIS has single hoses and liquid pilot lights; however, for those of you who travel to exotic locations, vapour pilot lights are an easy option. And the name IGNIS? Latin for FIRE – it simply does what it says on the packet!

Check out the competition and then buy the same amount of burn for fewer bucks from Kubicek. Czech style and a choice of colours comes FOC.

The Ignis burner comes with all the options that you would expect of a top-of-the-range product. The photograph at the top of this page shows the burner in both the one hose and two hose configuration. The one hose configuration matches with a liquid pilot light and the two hose with a vapour pilot light. The choice is yours. If you change your mind later on then it is a simple retrofit to change from one to the other.

Variable height is available as an option on the double Ignis and of course the burner is available as a triple and a quad as well as the more familiar double.

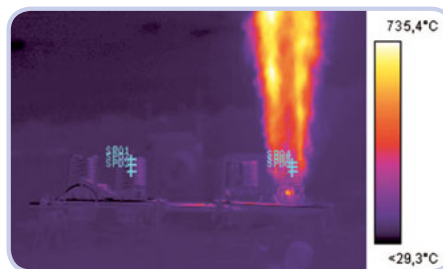

All these burners come in a choice of the colours, samples shown below these few words. Why not go wild and have your quad burner with one can in each of four different colours!

Finally we have added, for the technically minds amongst us, some interesting technical figures. Because pictures tell more than hundreds of numbers, pictures from thermovision camera tell the story. For the rest of us it is enough to say that this is a superbly designed burner that does the job and looks great. That's what the Czech Design Council thought when they awarded their prestigious 2007 design award to Kubicek for its Ignis burner.

Superb design; bags of colour and bags of power. Fly the Ignis burner – more power for less bucks!

Ignis

IGNIS – excellent product of the year

The Ignis burner won a top award in the 'Excellent Product of the Year' competition run by the Design Council of the Czech Republic. International jury has given it a title "The excellent design", with verdict:

"The design of the balloon burner IGNIS is characterised by a clear and homogenous composition of the body segmented by the colour and the finish of the individual functional elements. The ergonomics of controls and the regulation of fire form a strong organic element of this technological unit. It pleasantly contrasts with the traditional basket design."

Ignis

Ergonomically designed levers and a soft grip handle.

A design that is pleasing to the eye.

Liquid or vapour pilot lights. One or two hoses.

Triple spiral for better efficiency.
