Special shapes

Balloons from the Heart of Europe!

FLY KUBICEK SPECIAL SHAPES

Kubicek can build you a balloon in almost any shape that you desire. The special-shape that we will create for you will accurately depict the product, mascot or logo of your company and at the same time it will work as a fully functioning hot air balloon.

FIRST COMES THE DREAM

and a desire to lift your company above the mundane. Bring this dream, along with sketches or a specific product, to Kubicek Balloons and we will help you to convert your dream to a reality. In the photographs below it was the city of St. Gallen in Switzerland who wanted to celebrate the 200th anniversary of the foundation of their Canton by flying their cathedral.

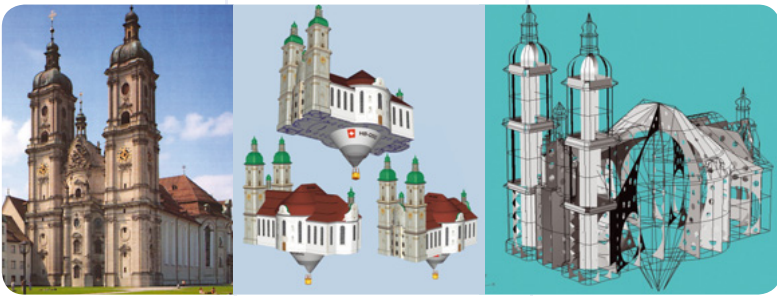

AFTER INITIAL DISCUSSION

we will produce a visual that will illustrate what we suggest building for you. If you decide to go ahead with the purchase then the balloon that we build will be the same as the visual that we have agreed.

In the case of the cathedral the visual and the balloon were a little shorter than the original building and the shapes of windows and pediments were produced by using fabric extensions and a considerable amount of hand painting.

THE THIRD ILLUSTRATION

is an engineer's drawing that shows how the external shape of the balloon will be retained by using internal baffles and curtains. The finished balloon will be a certified aircraft so, before it can be built, a vast amount of technical drawing and stress calculation will have to be undertaken to ensure that the finished product will pass a rigorous certification process.

WITH THE DRAWINGS

completed the production team will cut out and assemble to hundreds of panels that make up the balloon. To fully appreciate your balloon you should come and look at it whilst it is being constructed.

FINALLY COMES

the moment of truth when your balloon is inflated and flown for the first time. First flights are usually made from the launch field directly in front of the Kubicek factory. We use this field because it allows the people who build the balloons to take pride in their work. Your balloon is ready to start working for you.

WHEN THE ST. GALLEN BALLOON

first flew the media chased it and by the time that the ballon had been driven to its new home in Switzerland the value of the press coverage that it had already received exceeded the balloon's purchase price. The Canton's celebrations had started well!

CAN YOUR COMPANY AFFORD

not to be flying a special shape balloon? Remember that a hot air balloon is the only advertising hoarding that your potential customers will photograph and show to their friends! Call Kubicek Balloons today and start along a new and profitable advertising road. Your imagination is the only limitation – set it free to fly!
